Prométhée Earth Intelligence appoints Bruno Cotté as Chief Executive Officer

Paris, 2 July 2025 — Prométhée Earth Intelligence announces the appointment of Bruno Cotté as Chief Executive Officer. His arrival marks a key milestone in the structuring and acceleration of the company's development, at a time when it is entering a phase of industrialisation and international expansion.

With more than forty years' experience in the aerospace, defence and strategic industries, Bruno Cotté joins Prométhée Earth Intelligence with a deep command of both domestic and international dynamics, the management of complex organisations, and the delivery of high-value growth strategies.

A career serving French industry

Bruno Cotté began his career at Radio Océan (Philips Group), then at Scientech. He subsequently joined Thomson-CSF (now Thales), where he led business operations for the Middle East in the aeronautical equipment sector.

He then joined Dassault Aviation, where he held successive positions as Regional Director, Director of Military Exports, and International General Manager. He went on to lead Dassault International, before being appointed — by the major French industrial shareholders and the French State, on the recommendation of the President of the Republic — as Chairman and Chief Executive Officer of the Société française d'exportation de systèmes avancés (Sofresa).

In 2007 he joined the Alstom group as International Director, and subsequently moved to Safran, where he held several strategic international management roles, ultimately becoming Deputy Chief Executive Officer for International Development. He has also served as a board member of several defence and security companies.

Structuring an ambition, accelerating a vision

His appointment comes at a pivotal moment for Prométhée Earth Intelligence, as the company continues the deployment of its Japetus constellation while strengthening its services for civil and defence stakeholders, both in France and internationally. Bruno Cotté's arrival reflects the company's determination to organise and consolidate itself, and to rely on experienced leadership to take its growth to the next level.

“Against a backdrop of strong momentum, Bruno Cotté's appointment is part of our determination to structure Prométhée Earth Intelligence for this new strategic phase.” said Olivier PIEPSZ, President of Prométhée Earth Intelligence.

About Prométhée Earth Intelligence

Prométhée Earth Intelligence is the leading French NewSpace operator of a nanosatellite Earth observation constellation, with the mission of democratising the use of satellite imagery for a safer and more sustainable world.

PROMÉTHÉE Earth Intelligence addresses crisis management and sustainable development challenges by providing strategic intelligence and environmental intelligence services.

The scope of application offered by PROMÉTHÉE Earth Intelligence is virtually unlimited — from maritime surveillance and critical infrastructure monitoring, to the protection of ecosystems, water resources, wildlife and plant life, the fight against deforestation and illegal fishing, and the prevention of natural disasters.

Founded in January 2020, Prométhée Earth Intelligence has received backing from the French government, the public investment bank Bpifrance (BPI) and the French Space Agency (CNES) under the France Relance recovery plan. A member of the French Aerospace Industries Association (GIFAS), it has entered into partnerships with more than 50 French and European companies. Its first satellite was launched on 11 November 2023.
